

Vectorworks, Inc.

100-word description

Vectorworks, Inc. is a global design and BIM software developer serving over 650,000 professionals in the architecture, landscape and entertainment industries. Since 1985, we've been committed to helping designers capture inspiration, nurture innovation, communicate effectively and bring their visions to life. With our cross-platform software, designers can build data-rich, visual models without sacrificing the design process, while collaborating efficiently throughout the project life-cycle. Headquartered in Columbia, Maryland, with offices in Atlanta, Georgia and Newbury, England, Vectorworks is a part of the [Nemetschek Group](#). Learn how we empower designers to create experiences that transform the world at vectorworks.net.

Vectorworks Architect

100-word description

Vectorworks Architect is the industry's only BIM modeling, drafting and documentation software built with the design process in mind. As the architect's BIM tool, the software enables you to tackle complex ideas in 2D and 3D, refine construction details, explore your project's energy efficiency and streamline costs. Additionally, high-quality renderings can be created with ease and directly inside files thanks to default textures within thousands of Vectorworks content library objects and our easy-to-use Renderworks features. Learn how Architect empowers designers to transform the world like never before at vectorworks.net/architect.

Vectorworks Landmark

100-word description

Vectorworks Landmark software offers tools geared toward streamlining landscape-specific design and BIM workflows. Landmark's intelligent tools, such as plants, hardscapes, terrain models, automated irrigation design tools, powerful databases and flexible documentation features, will help you produce 2D drawings and 3D models to easily design, analyze, present and collaborate on projects. Applying geodesign processes in the planning of built and natural environments is simplified with integrated GIS file management. Additionally, high-quality renderings can be created directly inside a Vectorworks design file thanks to default texture and render settings within Vectorworks objects and Renderworks features. Learn more at vectorworks.net/landmark.

50-word description

With intelligent, parametric objects, powerful databases and flexible documentation features, Vectorworks Landmark software streamlines integrated 2D and 3D landscape-specific design, BIM and geodesign workflows. High-quality renderings can be created with default texture and render settings within Vectorworks objects and built-in Renderworks features. vectorworks.net/landmark

Vectorworks Spotlight

100-word description

Vectorworks Spotlight is the industry-leading software for entertainment design. In addition to 2D drafting and 3D modeling, realistic rendering and integrated database worksheets, Spotlight delivers advanced tools for the design and documentation of overhead stage rigging, lighting designs, design event objects, enhanced stage creation abilities and more. Additionally, high-quality renderings can be created directly inside files with default textures within thousands of Vectorworks content library objects and our Renderworks features. Whether used for lighting, scenic, event, TV, theatre, film or exhibit design, Spotlight empowers designers to create unmatched experiences. vectorworks.net/spotlight

Vision

100-word description

Vision software from Vectorworks, Inc. puts the power to previsualize and cue shows at your fingertips. This cross-platform software enables entertainment and production professionals to save time and money by enabling previz of the performance without the need to be at the venue or have the crew on standby. Built for accuracy with moving light fixtures and communication with a wide array of DMX consoles, Vision lets you experiment with looks and cues, as well as review options with your clients and collaborators to get their approval before loading in. vectorworks.net/vision

Vectorworks Fundamentals

100-word description

Vectorworks Fundamentals is our basic CAD software package, offering superior 2D and 3D capabilities and an intuitive modeling and documentation platform. The solution works the way designers think, enabling them the freedom of artistic expression through the development and documentation of each project. Seamless interoperability, flexible workflows and tools to help you capture and develop your ideas further support your creative process. Additionally, high-quality renderings can

be created with ease and directly inside files thanks to default textures within thousands of Vectorworks content library objects and our easy-to-use Renderworks features. vectorworks.net/fundamentals

Vectorworks Designer

100-word description

For projects that encompass elements of architecture, landscape and entertainment design, Vectorworks Designer software is the ultimate solution. Packing the power of the entire suite of Vectorworks' products including Architect, Landmark and Spotlight into one robust program, Designer offers digital terrains, plants, lighting, rigging, BIM modeling and rendering tools to help users draft, model and present in a single interface. Additionally, high-quality renderings can be created directly inside files with default textures within thousands of Vectorworks content library objects and our easy-to-use Renderworks features. vectorworks.net/designer
